
Model construction
Number of A trials
Non A trials
Pretrained model
A trials – Micro met
finetuning
Fine tuned model with p trials from $\mathrm{mm}(A)$
- p trials from $\mathrm{mm}(A)$
Non A trials
Pretrained model
A trials – alternative method x
finetuning
Fine tuned model with $x(A)$
A trials – Micro met
finetuning
Sequentially fine tuned model – first with $x(A)$ – second with p trials from $\mathrm{mm}(A)$
- $n_x(A)$ trials from $x(A),\ x \in \mathcal{S}^{\mathrm{alt}}$
- p trials from $\mathrm{mm}(A)$
A trials – alternative method x
Pretrained model
A trials – Micro met
finetuning
Fine tuned model with p trials from $\mathrm{mm}(A)$
- $n_x(A)$ trials from $x(A),\ x \in \mathcal{S}^{\mathrm{alt}}$
- p trials from $\mathrm{mm}(A)$
